SUMMARY

QA tester with hands-on experience in exploratory and structured testing, network traffic analysis, and defect reporting.

SKILLS

Testing: Manual Testing, Functional Testing, Regression Testing, Exploratory Testing, Test Case Design, Defect Reporting, STLC, SDLC, Agile

Tools: Jira, Postman, Charles Proxy, ADB, GitHub

Technical: Python, SQL, API Testing

WORK EXPERIENCE

Freelance QA Tester | Applause (uTest) — May 2026 - Present

- Performed exploratory and structured testing on major web and mobile platforms, including a popular cryptocurrency exchange, a multinational e-commerce site, and a global sportswear brand.
- Designed and updated test cases to cover core user flows, edge cases, and unexpected system behaviors across different app features.
- Inspected API network traffic using Charles Proxy to record .chls session logs, check JSON response data, and find hidden backend errors.
- Captured mobile system and crash logs on Android devices using ADB commands to pull real-time device logs, stack traces, and logcat data.
- Tested app layout and UI responsiveness across multiple web browsers, desktop OS, and mobile devices to identify display and navigation issues.
- Documented detailed bug reports, providing clear step-by-step reproduction flows, environment details, screenshots, console outputs, and network traces.

PROJECTS

Scryte — August 2026

- Building an AI-driven tool that takes a plain-English testing goal and a target URL, then automatically selects and runs relevant QA checks (broken links, form validation, search behavior, page health) using Playwright browser automation
- Exposing the tool's checks as an MCP (Model Context Protocol) server so any AI agent can discover and call them directly

ADDITIONAL INFORMATION

Certifications & Training : Python Programming (University of Helsinki, Ongoing)

HOBBIES AND INTERESTS

Stargazing, curious how things work, and going down internet rabbit holes on random topics
